

30 YEARS OF CONVENING POWER

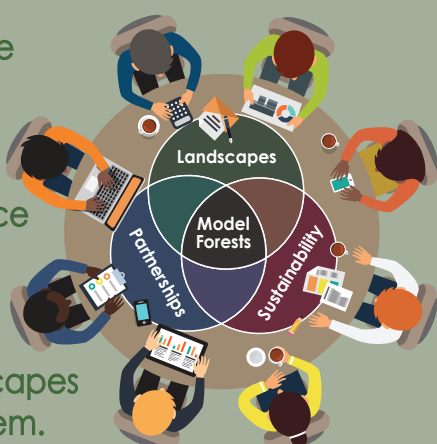

Model Forests, Multi-stakeholder Partnerships and Sustainable Development

FORESTS FACE MANY COMPETING PRESSURES DRIVING LAND USE CHANGE AND CONFLICT:

Sustainable solutions to these challenges must be focused on a common vision and shared interest

Model Forests are a proven multi-stakeholder platform for good governance and shared stewardship of forests and the larger landscapes that surround them.

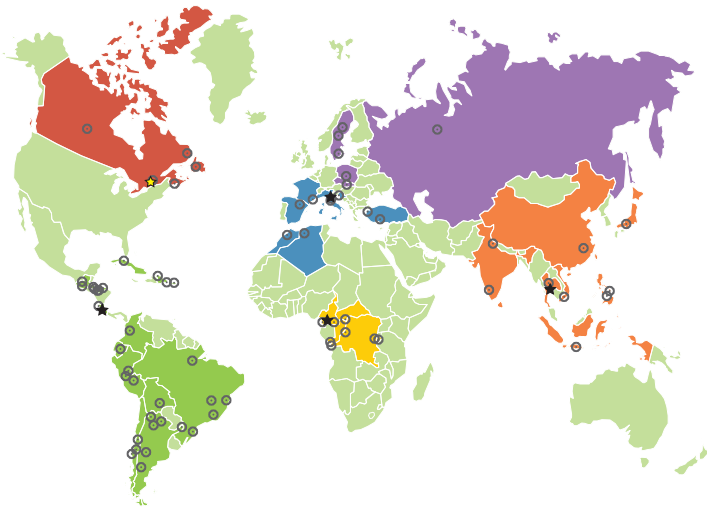

WE HELP REALIZE NATIONAL, INTERNATIONAL AND REGIONAL COMMITMENTS, INCLUDING:

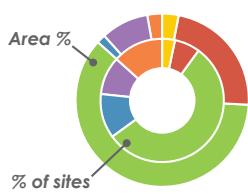

Each Model Forest is unique but all are governed by the same principles of trust, transparency and collaborative decision making.

Networking 'speeds up' sustainability by sharing successes and failures

What began in Canada in 1990 is now the world's largest network dedicated to sustainable landscape governance
